

Project Design Phase

Problem – Solution Fit Template

Date	26 June 2026
Team ID	SWTID-2026-8141
Project Name	Heart Disease Analysis and Visualization Dashboard
Maximum Marks	2 Marks

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps identify behavioral patterns and recognize what would work and why.

Purpose:

- Solve complex problems in a way that fits the state of clinicians, researchers, and patients.
- Turn scattered heart disease data into a validated, usable visual analytics solution.
- Confirm that the proposed dashboards genuinely reduce time-to-insight for the target users.

Customer Segment(s):

- Clinicians and cardiologists
- Hospital administrators
- Public health researchers
- Patients and families evaluating risk

Jobs-to-be-done / Problems:

- Quickly assess a patient's cardiac risk from multiple clinical indicators.
- Compare hospital infrastructure and case load across regions.
- Understand likely treatment cost and recovery time for a given risk category.

Triggers to Act:

- A new patient case requiring rapid risk assessment.
- Hospital resource planning cycles.
- A family member newly diagnosed and seeking clarity.

Emotions: Before / After

- Before: Anxious, overwhelmed by scattered data, uncertain about next steps.
- After: Informed, reassured, and able to act on clear visual insights.

Available Solutions Today:

- Manual review of paper/PDF medical reports.
- Static spreadsheets without interactivity.
- Generic health information websites with no personalization.
