

Project Design Phase-II

Customer Journey Map — Heart Disease Analytics Platform

Date	25 June 2026
Team ID	SWTID-2026-8141
Project Name	Heart Disease Analysis and Visualization Dashboard
Maximum Marks	2 Marks

Customer Journey Map: Based on simulated patient and clinician interviews for the Heart Disease Analytics platform. Scenario: A patient or clinician discovering, exploring, and acting on heart disease risk insights through the dashboard.

Stage	What Happens	Patient / Clinician Feeling
Awareness	Learns about the analytics platform through a clinic, hospital portal, or referral.	Curious but slightly anxious about heart health.
Access	Opens the Flask web application and views the landing page overview.	Reassured by a clean, simple interface.
Explore	Interacts with the dashboard: filters by age, gender, risk level, and region.	Engaged while exploring personalized filters.
Understand	Reviews risk-factor charts, diagnosis distribution, and treatment cost comparisons.	Informed and more confident about the data.
Act	Discusses findings with a doctor, plans preventive care, or schedules a check-up.	Empowered to make a data-driven health decision.
