

Ideation Phase

Define the Problem Statements

Date	24 June 2026
Team ID	SWTID-2026-8141
Project Name	Heart Disease Analysis and Visualization Dashboard
Maximum Marks	2 Marks

Customer Problem Statement Template: Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows the team to find the ideal solution for the challenges customers face, while empathizing with how they perceive the product or service.

Problem Statements:

PS	Customer	I'm trying to...	But...	Because...	Which makes me feel...
PS-1	A cardiologist / clinician who wants to assess a patient's heart disease risk quickly	review clinical indicators (age, blood pressure, cholesterol, ECG, etc.)	the readings are spread across paper charts and disconnected systems	there is no single interactive tool that visualizes risk factors together	It is time-consuming to spot high-risk patients and make timely decisions.
PS-2	A hospital administrator who wants to plan cardiac care resources	analyze patient case volumes and hospital infrastructure by region	the data is scattered across multiple hospital records	there is no centralized dashboard summarizing regional case load and facility availability	Unable to plan ICU beds, cath labs, and staffing efficiently.
PS-3	A public health researcher studying heart disease trends	analyze large volumes of patient and risk-factor data	spreadsheets do not support interactive, visual exploration	there is no tool to identify correlations between risk factors and diagnosis outcomes	Unable to quickly identify trends and support preventive health policies.
PS-4	A patient or family member trying to understand heart disease risk and treatment cost	compare risk categories, likely procedures, and expected treatment cost	this information is scattered across hospital websites and brochures	there is no single platform that presents this information visually	Difficult to plan for treatment and make informed healthcare decisions.
