

Ideation Phase

Empathize & Discover

Date	24 June 2026
Team ID	SWTID-2026-8141
Project Name	Heart Disease Analysis and Visualization Dashboard
Maximum Marks	4 Marks

Empathy Map Canvas: An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps teams better understand their users by considering the problem from the user's perspective, along with their goals and challenges.

User Persona: A cardiac patient / at-risk individual seeking clarity about their heart health.

Says

- "I don't know if my symptoms are serious."
- "I want to understand my risk before it becomes an emergency."
- "The reports use terms I don't fully understand."

Thinks

- Worried about family history of heart disease.
- Wonders if lifestyle changes will actually reduce risk.
- Concerned about the cost of treatment if diagnosed.

Does

- Searches the internet for symptoms and risk factors.
- Delays visiting a doctor due to cost or fear.
- Relies on fragmented reports from multiple check-ups.

Feels

- Anxious about an uncertain diagnosis.
- Overwhelmed by scattered medical data.
- Relieved when given a clear, visual explanation of risk.

Pain Points

- No single place to view all risk indicators together.
- Difficulty comparing treatment cost and recovery expectations.
- Lack of accessible visual insight into personal cardiac risk.

Gains

- A clear, visual summary of key risk factors.
- Confidence in discussing results with a doctor.
- Better ability to plan preventive care and budget for treatment.
